An On-Site Wind Energy System consisting of a wind turbine, a tower, and associated control or conversion electronics, which is intended to provide electrical power for on-site use only and is not intended or used to produce power for resale or distribution. An OWES might be connected to the local utility grid or be off-grid. On-site wind energy systems are classified as follows:

a) **Micro OWES:**

A wind energy conversion system, which has a rated capacity of less than 5 KW.

b) **Small OWES:**

A wind energy conversion system, which has a rated capacity of between 5 and 30 KW.

c) **Medium OWES:**

A wind energy conversion system, which has a rated capacity of between 30 and 100 KW.

Commercial Wind Energy System (CWES):

A Commercial Wind Energy System is a system, which is intended to produce electricity for resale or distribution purposes. A commercial wind energy system could consist of a single freestanding windmill or a cluster of a number of windmills situated in the same location called a wind farm.

Turbine:

The parts of a wind system including the rotor, generator and tail.

Total System Height:

The height from ground level to the top of the rotor at its highest point.

Wind Turbine Tower:

The guyed or freestanding Structure that supports a wind turbine generator.

Wind Turbine Tower Height:

The height above grade of the fixed portion of the wind turbine tower, excluding the wind turbine and rotor.

Off-grid:

A stand-alone generating system not connected to or in any way dependent on the utility grid.

Behind the meter:

A generating system producing power for use on a grid-connected property, but which system may or may not be capable of sending power back into the utility grid.

5.2 PERMITTED USE

Establishment of micro wind energy systems (with a rated capacity not more than 5 KW) shall be permitted in all Zones subject to meeting all requirements of this section and any other relevant provisions of this Bylaw.

No person shall Erect, construct or install a small or medium wind energy system without first obtaining a Development Permit from Council. All OWES(s) shall be constructed and operated in a manner that minimizes any adverse visual, safety and environmental impacts.

No permits shall be issued for a Commercial Wind Energy System (CWES) without an amendment to this Bylaw.

5.3 DEVELOPMENT PERMITS AND AGREEMENTS

Council may issue a Development Permit for the establishment of an on-site OWES with a rated capacity between 5 and 100 KW, subject to a written Development Agreement signed by the applicant pursuant to such terms and conditions, as Council deems necessary. Prior to the issuance of a Development Permit, Council shall ensure that:

1. The Development does not cause any hardship to surrounding property owners due to excessive noise, safety issues, traffic congestion or any other potential disturbance;
2. The development is deemed appropriate and complements the scale of any existing development;
3. Property owners within 300 m (1000 feet) of the subject OWES shall be notified in writing of details of the proposed development and asked to provide their comments;
4. All other relevant provisions of this Bylaw and provincial *Planning Act* and related national regulations shall be met.

5.4 SHARED WIND ENERGY SYSTEMS

An on-site OWES with a rated capacity between 5 and 100 KW shared by multiple Single Family Dwellings may be permitted subject to meeting the requirements of Section 5.3.

5.5 WALL OR ROOF-MOUNTED SYSTEMS

Considering wind energy's fast paced technology, emerging new structures, materials and specifications, every small wind energy system fixed to a building shall be considered individually.

1. A structural engineering analysis of such a wind turbine during installation and operation may be required and certified by a licensed professional engineer including requirements if the turbine is to be installed on any Duplex or Multiple Family Dwelling.
2. The Wall or Roof-mounted turbine height shall be no higher than 5 ft. above the building height.
3. A Wall or Roof mounted small wind energy system shall not be installed within five hundred feet (500') of any adjacent dwelling without the written permission of the owner.

5.6 WIND TURBINE TOWER HEIGHT

The Wind Turbine Tower Height is subject to the setback requirements below, and provided that the application includes evidence that the proposed height does not exceed the height recommended by the manufacturer or distributor of the system.

5.7 SETBACK

1. The turbine base shall be no closer to any Lot Line than five times the height of the wind turbine.
2. No part of the wind system structure, including guy wire anchors, may extend closer than thirty meters (100 ft.) to the Lot Lines of the installation site.
3. The tower height of any OWES shall not exceed 24.4 metres (80 feet) in any Rural Zone and 48.8 metres (160 feet) in any other Zone.
4. Any OWES shall be located at a distance of at least 3.0 times the total system height from any habitable buildings.

Council may waive setback requirements from adjacent properties if such adjacent property owner agrees to grant an easement binding on the current and future owners.

In addition to satisfying the minimum setback requirement noted above, the minimum distance of a freestanding wind turbine from an inhabited dwelling shall meet the setback requirements for the noise generated (see section 5.8 below).

5.8 NOISE

1. The mean value of the sound pressure level from any wind energy systems shall not exceed more than 5 decibels (dBA) above background sound, as measured at the exterior of the closest existing or potential neighbouring inhabited Dwelling (at the time of installation or during operation), for wind speeds below 10 m/s and except during short term events such as utility outages and/or severe wind storms.
2. Notwithstanding the above noise regulation, the maximum allowed noise level generated by a wind energy system in residential areas shall be 45 dBA for wind speed 10m/s, as measured at the exterior of the existing (or future) closest neighbouring inhabited dwelling.

5.9 SHADOW FLICKER

Shadow flicker at any point of neighbouring inhabited dwellings shall be minimized and not be permitted to exceed 30 hours per year as a result of the operation of the wind turbine.

5.10 NUMBER OF TURBINES

A maximum of one OWES per property shall be permitted.

5.11 COMPLIANCE WITH CANADIAN BUILDING CODE

Permit applications for small wind energy systems (OWES) shall be accompanied by standard drawings of the wind turbine structure, including the tower, base, and footings, anchoring method and drawn to scale. An engineering analysis of the wind turbine tower showing compliance with the Canadian Building Code and certified by a licensed professional mechanical, structural, or civil engineer shall also be submitted. Documentation of this analysis supplied by the manufacturer shall be accepted.

5.12 COMPLIANCE WITH AIR TRAFFIC SAFETY REGULATIONS

Where it is required, small wind energy systems must comply with applicable air traffic safety regulations. A statement on compliance by the applicant is sufficient. Small wind turbine towers shall not be artificially lighted except as required by Navigation Canada.

5.13 COMPLIANCE WITH EXISTING ELECTRIC CODES

Building permit applications for small wind energy systems shall be accompanied by a line drawing of the electrical components in sufficient detail to allow for a determination that the manner of installation conforms to existing electrical codes, if applicable.

5.14 UTILITY NOTIFICATION

No grid-interconnected wind energy system shall be installed until evidence has been provided that the utility company has been informed of the customer's intent to install an interconnected customer-owned generator. A copy of a letter to the applicant's utility is sufficient. No response or evidence of approval from the utility is required.

Off-grid systems and grid-tied systems that are capable of feeding onto the grid with advanced control grid fault protection and disconnect switches covered under the electrical code shall be exempt from this requirement.

5.15 ABANDONMENT OR DECOMMISSIONING

Should a wind energy system located on a site appear to Council to have discontinued producing power for a minimum one year, the system's owner must upon request from Council, prepare a status report. Following review of the status report, if in the opinion of Council power will not be produced on the site within a reasonable period of time, Council may order that the wind energy system located on the site be decommissioned in accordance with the decommissioning plan submitted at the time of the issuance of the development permit.
