Funding Announcement!

The Rural Municipality of Kingston is delighted to announce that the much needed Emyvale Recreation Centre Renovation and Addition Project will start this October and be completed by March 31 st 2027. We wish to thank both the Federal and Provincial Governments for their funding agreements that have made this project possible. The Federal Government has contributed through the Building Communities Strong Fund, Community Stream and the Local Impact Stream. The Provincial Government has contributed through the Rural Growth Initiative Fund. The Municipality is also a major contributor to this project.

Renovations and general maintenance for the Rec Centre will ensure its long term viability. The expansion will enable the hall to provide more space and improved services to the residents. We look forward to residents joining us to make the Centre a busy place bringing residents together. We also wish to thank the Provincial Government through its Community Renewable Energy Generation Program for funding our electrical upgrade and solar panel install.

Now that the Renovations will take place, the solar panel will be installed once the roof replacement has been completed. An official announcement will take place in October. We will let you know through our website, <https://kingstonpei.ca/>, on our bulletin board at the entrance to the hall and on our roadside sign.
